Aspire V Nitro

Design to rev up your life

With its exclusive combination of innovative features, the Aspire V Nitro Black Edition represents the apex of the Aspire V Nitro Series. Designed to stand out, the Black Edition offers a new level of premium customization. Breathtaking visual detail, high octane performance, and an entirely unique aesthetic combine to set the Black Edition apart. Truly extraordinary, the Aspire V Nitro – Black Edition is built for life in the fast lane.

Aspire VN7-591G

Acer DustDefender

- Constructed out of lighter and stronger metal, the Acer DustDefender fan blades utilize an ingenious dust propelling mechanism and an extremely high speed to vastly improve heat dissipation from high performance components. By both removing dust and maintaining cool, the Acer Dustdefender extends product lifecycle and enhances user comfort for uninterrupted productivity.

Ultra-thin blades to enhance cooling power

- Acer Dustdefender is not just thinner and stronger, it also reduces distracting noise. The extremely slim build of each metallic blade creates more space between blades as compared to plastic alternatives. This increase in space allows the Acer DustDefender to release thermal exhaust more efficiently to keep you cool and ensure that the Black Edition's powerful performance is always consistent.

4 Build-in Speaker

- Enjoy powerful surround sound for all of your gaming, film, and music needs. Sound regeneration comes to life with the Aspire V Nitro series audio experience. With 4 speakers (8W output in total) expect incredible full-range audio from all angles. Live life loudly with Acer full audio immersion.

Acer recommends Windows.

Gaming grade visual experience

- The Black Edition features the latest Nvidia® GTX 860M graphics to provide users with the ultimate gaming grade visuals. Expect cutting-edge performance and smooth game play to outsmart and outlast your competitors.

Full HD Display with IPS Technology

- Full HD display delivers high resolution and realistic visual experience. Enjoy and share bright colors, dazzling detail and enhanced imagery without ever worrying about battery life. A display with IPS technology provides a wide viewing angle allowing you to share content simply and easily with those around you.

Aspire VN7-791G

Aspire V 13

Superb style, great power

The Acer Aspire V 13 is an impressive combination of stylish design, lightness, and computing power. Its slenderness and long battery life makes it highly portable, while its great hardware and Windows software make it your efficient companion for getting work done on the road, in style.

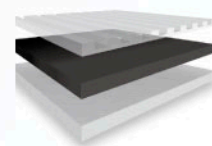

Acer nano-imprint patterning

- Nano-imprint patterning is an advanced surface-finishing technology for metal panels. Unlike traditional anodizing, nano-imprint patterning offers more and richer patterning possibilities, while consuming less energy and production time.

Choose between two attractive nano-imprint patterns, "Hidden Code" and "Geometric Arrows", which both create rich "play of light" reflections similar to that created by cut gems.

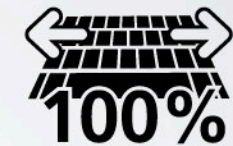

Fine-tuned touchpad

- The Aspire V 13's improved Precision Touchpad offers more accurate gesture control and an improved scrolling experience. The enhanced sensitivity and accuracy makes the computing experience as easy and efficient as ever.

Roomy working surfaces

- The interior design enhances this notebook's productivity even more with a spacious chiclet keyboard and touchpad. Its full-size keyboard features a roomy 3.6 mm distance between keys, for comfortable typing and precise feedback on each input.

Slender and slim

- For great experiences on the go, the Aspire V 13 features a thin and light body- just 19.65 mm thin and 1.5 kg light. Tuck it into your bag and forget about it.

Freedom from power outlets

- 7 hours of battery life gives you a full workday of usage while on the move. The Aspire V 13 offers a longer battery life than its competitors, maximizing your freedom to accomplish all of your daily tasks while staying unplugged.

Acer recommends Windows.

UltraThin

Ultra-thin

- As thin as 20.8mm design delivers great mobility.

HDD Protection

- A Rubber cover wraps up the hard drive to absorb any hits. Specially designed to reduce any hits on the frailer part of hard drive, Acer DASP provides extra exterior protection over the hard drive and all the data inside.

G-sensor FreeFall Protection

- The protection system uses the G-sensor to detect a sudden drop and then terminate all operations on the hard drive and safely park the read-write head. The protection minimizes damages caused by sudden severe motion of the disk, and protects the system and all the data inside.

Cooling System

- Designs of the location of heat interfaces and four air intake vents effectively cool down P645, without making users feel overheated even if it is on laps.

Your Best Partner

Packing features for **superior productivity**, **steadfast reliability** and **seamless connectivity**, the next-gen TravelMate P645 is the best partner for driving success.

IPS Technology

- Consistent, accurate color from wide viewing angles, without having any blur. No tailing or color washout when touched. Acer ComfyView™ anti-glare technology gives a crisper view wherever users are.

Three Independent Displays

- Split the display output to up to three separate monitors. This makes it much easier to work with multiple documents and programs at the same time, which greatly improves work efficiency.

Good type in the dark

- Via the keyboard equipped with LED-backlit module, users can reach the keys they want even in a weak lightening environment.

Aspire Switch 10

A 2-in-1 as versatile as you are

Can a machine be brilliant? The Aspire Switch 10 thinks so. The Aspire Switch 10 delivers a lifelike visual experience. New generation Gorilla® Glass 3 display protects against scratches and improves its toughness and durability. Moving smoothly between four modes, the Aspire Switch 10 boosts productivity no matter where your journey takes you.

Flip, detach and switch to find a mode for every moment

Use as a mobile tablet on-the-go, optimize productivity in its comfortable notebook mode, and pivot the screen in multiple ways to share and create with others.

Notebook

- A fully functional laptop and keyboard are ideal for optimizing your work life
- Precision touchpad and a comfortable keyboard combine for easy navigation and typing

Pad

- Use as a tablet and browse your favorite webpages, play exciting games, and watch the newest films all in the palm of your hands

Tent

- The perfect mode when space is limited. Easily share a recipe in the kitchen or set up on a slim bookshelf.

Display

- Present your proposal or broadcast a video conference at work
- Easily share images or movies with others
- Use as a large photo frame to display your favorite memories

Acer recommends Windows.

Tougher than ever with Gorilla® Glass 3

- The Aspire Switch 10 features Gorilla® Glass 3, the latest in screen glass technology. With Native Damage Resistance™, Gorilla® Glass 3 boasts a proprietary glass composition that provides tough protection, resisting both surface-level and deep scratches, so your screen is more durable than ever. With its improved strength, the Aspire Switch 10 features 3x scratch resistance and reduced scratch visibility.

Stay mobile with a thin and light design

- At just 8.9mm (tablet) and 20.2mm (dock included), the Aspire Switch 10 is the thinnest 2-in-1 on the market and weighs only 1.17kg. Acer's innovative Snap Hinge™ leaves its heavier and more complex competitors behind. Its design allows for clean and smooth transitions while still maintaining a traditional flat top cover for a slim and elegant look.

≤1.2kg

Display with IPS Technology*

- A display with IPS technology* provides a wide viewing angle of up to 178 degrees, allowing you to share content simply and easily with those around you. From bedtime storytelling to watching a movie, you'll experience a consistent color and viewing experience from any perspective.

Explore with the slim and flexible Acer Snap Hinge™

- The Aspire Switch 10's Snap Hinge™ was designed for smooth transitions between tablet and notebook mode. Using a magnetic and latch-less design, the Snap Hinge™ makes it extremely easy to attach or detach the tablet and explore all four modes.

Aspire S7-392

The Best Gets Even Better !

The new Aspire S7 Ultrabook™ is still beautifully slim, tough and light, yet has InstantGo for data refreshed all the time, improved battery life for going all day, a refined keyboard for more natural typing, and 2nd generation Acer TwinAir cooling with quieter fan.

Hinge Frame Design

- The hinge structure is directly attached to the innovative forged display frame, which enhances stiffness while maintaining a slim design. And, the wobble effect is reduced when touched.

Gorilla Glass 2 Cover as Construction

- Acer is the 1st company to use Gorilla Glass for notebook construction; others only use it as a decorative finish.

Aluminum Unibody Design

- S7-392 features a case made from single block of aluminum. CNC machining makes the case extremely thin, yet super tough and ideal for daily use on the road. The evolved, eco-friendly CNC process saves a lot of energy and raw materials.

One Click for Touch and Show Sharing

- The display is able to open to 180 degree. Just press a Fn+O and you can easily share the content with the person sitting across from you.

2nd Generation Acer TwinAir Cooling

- Thanks to 2nd generation Acer TwinAir cooling technology, the maximum of noise is 31dBA at maximum loading (9dBA quieter than S7-391). This means the system is extremely quiet and comfortable to use. The unique placement moves the hottest components away from users' fingertips. It cools palm rest and keyboard area; the heat can barely be noticed.

Aspire S3

Acer recommends Windows.

A beautiful, full power Ultrabook!

The Aspire S3-392 is a fashionable 13" Ultrabook™ with the full performance and high scalability of a standard notebook, yet only 17.8 mm thin. The S3 is ultra responsive with a powerful 4th generation Intel® Core™ processor, and takes just a second to resume when you open its Sparkling White aluminum cover.

Cutting-edge design

- The cutting-edge design of the Aspire S3 sets it apart from other Ultrabooks™. The patented dual-torque hinge and auto light-sensing keyboard make both touch and type input stable and comfortable. Plus, the aluminum case takes bumps in stride, and Acer TwinAir cooling technology keeps the S3 cool and quiet without sacrificing performance.

Lightning-fast responsiveness

- Ready when you are, Acer Fast Resume wakes the Aspire S3 in just a second, and with Intel® Smart Connect Technology, it always stays connected and up to date. You'll even save time powering-on the system: it automatically fires up from shutdown mode as soon as you open the lid.

Wobble-Free
Dual-Torque Hinge

Aspire V 11

Eye-catching new FlowCurve Design

The slim body is only 21.7 mm thin. The rising rear panel helps you to grab it easily. The tapering side edges of the machine also makes the Aspire V 11 seem even thinner and more fashionable. The I/O ports of the Aspire V 11 are well organized and nicely placed on the side and rear panels.

Great interior

Clean control surfaces

- From the display area, to the hinge, and to the control surface (from the outside all the way to the inside), you will have a uniquely smooth viewing experience, thanks to the "FlowCurve" design.

Premium aluminum top cover

- The Aspire V 11 features an anodized aluminum top cover with a hairline-brush finish. The top cover is surrounded by smooth resin to protect and strengthen the metallic part.

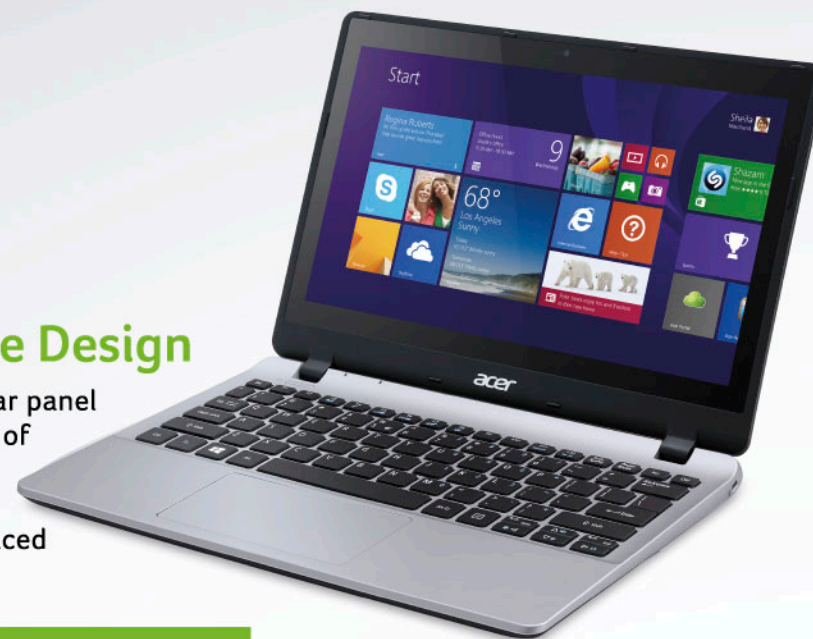

Fan-less chassis, easy and comfortable

- Very little noise, even after prolonged use – thanks to the clever fan-less design. No fan means no heat gets blown out near your hand or lap while using the NB.

Cool palm rest and keyboard

- As part of the fan-less design, the hot components are placed away from the keyboard and palm rest. During testing, the heat could hardly be noticed¹.

¹.Specifications vary depending on model.

Aspire E 14

Acer recommends Windows.

Everyday essentials enhanced

They may serve as essential devices, but Acer's Aspire E Series laptops go beyond the everyday tasks. The E Series is a touch smarter, faster and easier to use than most essential laptops. The E Series enables users the freedom to be more productive and creative and immerse themselves in videos, photos and music.

Ultimate portability

- Thin and portable, with an easy grip, the Aspire E Series is the ideal partner to go anywhere and work anytime. You can stay connected throughout the workday with 7 hours of battery life* and do a touch more each day.

Express yourself

- The Aspire E 14 Series comes in three sophisticated colors to fit your style whether at the office or with the family — Midnight Black, Pearl White and Sapphire Blue.

Sensational fun

- Whether you're playing a game, listening a song or streaming a movie, the high-definition LED display* and graphics capabilities enhance every multimedia experience. Available in several lively yet sophisticated colors.
